Strategies & Tactics of Patrol Stops Instructor Course And Recertification

(STOPS)

Provided by

Pro Train, Inc

April 18-21, 2016

Officers completing this course will be certified to INSTRUCT officers in the STOPS officer survival program. Upon completion of the STOPS program your officers will be able to SAFELY execute vehicle stops, pedestrian contacts, vehicle extractions, drug interdiction stops, and high risk (felony) stops. Officers will be trained in risk assessments, and proven methods to counter both felonious and accidental assaults. Vehicle stops will be broken into 8 kill zones for the officer to be aware of, and pre planned escape techniques to counter the assault. The STOPS program is based upon research from officers that have been injured or killed in the line of duty. We then developed strategies and tactics that countered the assaults, which will greatly increase the officer's survival probability. The STOPS program is nationally and internationally recognized as the foremost tactical/officer survival training available today. Vehicle stops will be broken into low risk, unknown risk, and high risk. Each category has pre planned methods to minimize the chances of being assaulted by accidental and felonious means. The STOPS program is currently instructed at numerous police academies nationwide as THE way to conduct traffic stops. If an officer is expected to conduct traffic stops, drug interdiction stops, pedestrian contacts, and high risk stops he/she should at least be trained how to conduct them safely. Our motto says it all "STOPS SAVES COPS"!

RECERTIFICATION for this course will also be offered on April 19-20, 2016

**Class will be held at:
National Guard Armory
3300 Division Street
Evansville, IN**

- Registration is at 7:30am on the first day of class. Class will be 8am - 4:00pm.
