- Barrier Penetration

YOU'LL LEARN

At Modern Day Sniper, we reject the traditional division of "basic" and "advanced" courses when it comes to the professional application of marksmanship with a scoped rifle. We believe that the essential distinction is not between basic and advanced skills, but between the levels of efficiency with which shooters apply these skills. Regardless of their experience level, students graduating from a basic class are expected to navigate and problem-solve dynamic situations.

CLASS PREREQUISITES

Restricted to law enforcement & military snipers with verified credentials.
